

Andrew S. Voyles, Ph.D., EIT

andrew.voyles@berkeley.edu ◊ (510) 486-7310 ◊ <https://avoyles.github.io>
Nuclear Science Division ◊ Lawrence Berkeley National Laboratory
Building 088-163D — M/S 88R0192 ◊ Berkeley, CA 94720 USA

EDUCATION

University of California, Berkeley

Ph.D., Nuclear Engineering
Nuclear Regulatory Commission Graduate Fellowship

Berkeley, California
August, 2018

University of Utah, Honors College

B.S., *cum laude*, Chemical Engineering
Minors: Nuclear Engineering, Chemistry
University of Utah President's Club Scholarship, Dean's List, 2009 - 2013

Salt Lake City, Utah
May, 2013

RESEARCH EXPERIENCE

University of California, Berkeley

Assistant Research Engineer

Berkeley, California
June, 2019 – Present

- Led fundamental studies of low-energy nuclear physics at the LBNL 88-Inch Cyclotron as a part of the LBNL/UCB Nuclear Data Program, and supervised M.S./Ph.D. students in these efforts.
- Efforts include the measurement of charged-particle and neutron-induced reaction cross sections relevant to the production of radionuclides for medical applications, and the measurement of independent and cumulative fission yields using cyclical neutron activation analysis,
- As Isotope Production Group leader, responsible for developing the technical vision for these research objectives, and facilitating interactions with other research organizations to promote collaboration and enhance the impact of research results, chiefly with LANL and BNL.
- Compiled all nuclear data produced in experiments into the reaction database EXFOR.

Postdoctoral Scholar

August, 2018 – June, 2019

- Responsible for overseeing the effort to determine novel production routes for ^{225}Ac , ^{212}Pb , ^{68}Ge , and ^{236}Np , through experiments at the LBNL 88-Inch Cyclotron as a part of the LBNL/UCB Nuclear Data Program.
- Developed in-house capabilities for electrodeposition and pressed-powder target fabrication.
- Assisted other members of the group by supervising M.S./Ph.D. student efforts to determine isotope production routes through cross section measurements at LBNL, LANL, and BNL.

Graduate Student Researcher / NRC Fellow

August, 2014 – August, 2018

- Dissertation Title: “Nuclear Excitation Functions for the Production of Novel Medical Radionuclides” — measurement of cross-sections for neutron-induced and charged particle-induced reaction pathways for the production of emerging novel therapeutic and diagnostic medical radionuclides, with high specific activity.
- Dissertation Advisor: Dr. Lee A. Bernstein, University of California, Berkeley
- Developed intense mono-energetic neutron source capabilities for production of novel therapeutic radionuclides.
- Research carried out at the Lawrence Berkeley National Laboratory's 88-Inch Cyclotron and the Los Alamos National Laboratory's Isotope Production Facility at LANSCE.

University of Oslo

Visiting Researcher, Department of Physics

Oslo, Norway
February – May, 2018

- Studied preparation of a chelate-conjugated biomolecule carrying a radionuclide, in the Nuclear and Energy Physics group.
- Focus on the radiolanthanide ^{161}Tb and a peptidomimetic displaying dual-receptor targeting through the endothelial growth factor receptor and the HER2/neu antigen.

Institute for Laser Engineering, Osaka University

Visiting Researcher

Osaka, Japan
February – March, 2015

- Research and evaluation of solid debris collection diagnostics in search of evidence of nuclear-plasma interactions.

University of Utah Salt Lake City, Utah
Undergraduate Researcher, Nuclear Engineering **August, 2010 – August, 2011**

- Developed simulation of Neutron Activation Analysis, an analytical technique using neutron irradiation of matter to determine highly precise compositions of samples.
- Simulation optimizes irradiation times of samples to minimize resulting radioactivity.
- Presented paper at 2011 ANS Student Conference, 2011 2nd Utah Detection Conference.

Undergraduate Researcher, Chemistry **August, 2009 – May, 2010**

- Synthesis and characterization of metal-doped Cadmium-Selenium quantum dots used to produce photonic crystals structured after iridescent scales of several Brazilian beetles.
- Applications include fully-optical circuitry and tunable, customizable photoluminescent sensors for desired molecules and/or cells.
- Later research involved sol-gel dip-coating quantum dots for use in geothermal wells.

University of West Florida Pensacola, Florida
Visiting Researcher, Department of Physics **May, 2008 – January, 2009**

- Modeled specific heat capacity anomalies of 4'-octyl-4-biphenyl-carbonitrile liquid crystals, due to the effect of mesophase transitions.
- Research proceeded to place third in the 2009 Florida State Science Fair, and as a finalist in the 2009 Intel International Science and Engineering Fair.

TEACHING
EXPERIENCE

University of California, Berkeley Berkeley, California
Graduate Student Instructor

- NE 101 / 210M — Nuclear Reactions and Radiation **Fall 2015**
 Wrote and graded homework sets for class of 41 undergraduate and graduate students, and led weekly discussion sections for entire class on supplementary material and applications of course material. Mentored students through semester in their coursework, and helped doctoral-track graduate students prepare for their departmental screening exams in this topic.

University of Utah Salt Lake City, Utah
National Science Foundation Outreach Mentor **May, 2010 – May, 2013**

- Created and presented hands-on demos to local schools, to advocate engineering and science careers, focusing on historically underrepresented demographics.

Teaching Assistant

- CH EN 2300 — Thermodynamics I **Spring 2013**
- NUCL 3000 / 5030 — Nuclear Principles in Engineering **Fall 2011**
 Designed semester-long computational simulation projects using GEANT4 for class of 63 undergraduate and graduate students, after teaching GEANT4 programming to class. Mentored students through semester in developing their projects, as well as coursework.

GRADUATE
SUPERVISION:

Advisee Name	Organizational Affiliation
Nora Pettersen	University of Oslo, Physics M.S. student (2018 – Present)
Hannah Ekeberg	University of Oslo, Physics M.S. student (2018 – Present)
